

## KABOOST portable chair booster does its job from 'down under'

KABOOST, recently introduced by Boost Corporation a portable chair booster that raises the height of most kitchen and dining room chairs so that a child can sit at a table just like a grownup. Made from heavy-duty plastic and using an adjustable spring system, KABOOST snaps on to a chair in seconds. Spring-loaded arms firmly grip chair legs, and KABOOST stays attached even when the chair is moved.

KABOOST's patent-pending design easily adjusts to fit most 4-legged chairs (round or square legs), and its non-slip rubberized feet won't scratch floors. Weighing just 3.5 lbs., KABOOST is compact and lightweight and is easy to fold and carry. KABOOST has two elevating height positions, equivalent to the same heights of standard booster seats which allows it to grow with a child. KABOOST comes in a variety of colors. KABOOST is sturdy, holds up to 300 lbs., and is engineered to improve chair stability.

KABOOST carries a suggested retail price of under \$39.95. Minimum order quantity is 1 case which includes 6 units. For more information call 212/ 625-8644 or visit [www.boostcorp.com](http://www.boostcorp.com).

## Lil BahBee introduces strap to secure bottle/cup to chair

The Lil BahBee Company recently introduced the Bottle Tamer®, an adjustable strap designed to attach to a child's baby bottle, sippy cup, or toy to a stroller, high chair, car seat, or shopping cart.

The Lil BahBee strap prevents a child from constantly throwing a sippy cup or bottle to the ground, eliminating lots of parent time spent retrieving the bottle, and also eliminating lost and dirty bottles and cups.
